

ADVANTAGES

- Individual room separation for both indoors and outdoors
- Different shapes and dimensions far beyond the known sizes on the market
- Low static load on the construction structure, even with oversized pots. Custom positionable bottom plate allows weight reduction and saving on the filling material
- Different surfaces, rough or smooth finishes as desired in every RAL color
- Frostproof: reinforced weldings and the used material allows a restriction-free usage outdoors. Optional water overflow openings are available if requested
- Indoor Application: standard waterproof version with optional water level indicator
- Corrector spray or corrector bottle with brush. Subsequent repair of cover-paint with the original color after damage or signs of wear (abrasions, scratches, etc.)
- Root protection. Planter material is not heat conductive, which protects the roots from heating up, or burning
- Stable planter walls. Additional elements, such as railing parts, trellis, etc. can be attached to the planter.
- Shadow gap trim. Hidden foot parts, for an elegant appearance

APPLICATION

DiaLog® planters are a family of timeless polypropylene planters in a variety of sizes and shapes that can be used outdoors to decorate and border terraces, underground garages, large manholes, fountains, raised beds and gardens, and indoors for planting solitary and hydroponic plants. Special design background, structural engineering for stable side walls.

DIADEM® BUILD-UP

SPECIAL GROWING MEDIA
According to the needs of the plants

FILTER FLEECE

RAISED FLOOR PLATE
Prevents the leaking of water

DRAINAGE

SPECIFICATION

Planter made of high-quality break- and frost resistant plastic, with built-in rainwater reservoir and filter fleece to prevent the fine particles to be washed out, and with pre cut drain hole, for indoor or outdoor application. Material: polypropylene; dimensions: according to individual needs; colour: in choice of RAL colours.
